## Hobbies

1. I love playing the drums because it allows me to express my creativity and relieve stress.
2. Skiing in the mountains is my favorite hobby because it combines my love for nature and adventure.
3. Playing computer games is a great way for me to unwind and have fun with friends.
4. I've been playing basketball since I was a kid and I still love it because it's a great way to stay active and competitive.

## Profile

Front-end developer with 1 year of software development experience. The technology stack includes JavaScript as the main programming language and the React library. Diligent, determined, goal-oriented and highly reliable individual with exceptional creativity, problem solving and interpersonal skills.

## Employment History

### Javascript Developer, Andersen Lab , Kraków

AUGUST 2022 – PRESENT

#### PROJECTS

##### Banking application

Web application for remote banking customer service. The system allows clients to receive information about banking products (loans, deposits, cards), make payments, for example, pay for Internet communications, digital television services, and utilities. On the platform, users can replenish e-wallet accounts, make payments using arbitrary details, transfer money between deposits and bank cards, as well as exchange currency and issue new products

##### Responsibilities

- Developing new features and components
- Identifying and addressing performance bottlenecks
- Utilizing good design practices, code reuse and writing efficient source code
- Writing unit tests
- Devising possible solutions to anticipated problems
- Working in an Agile environment

## Education

### Master's Degree, National Research University "Moscow Power Engineering Institute", Moscow

SEPTEMBER 2011 – JUNE 2017

Master's Degree in Thermal Engineering and Heat Technology
