Krakow, Poland

PROFILE

Hard-working, sociable, positive and active **front-end developer with over 4 years of commercial experience** and working in such domains as Fintech, Media & Entertainment and Automotive Solutions. Proficient in JavaScript and React, Node.js. Contributed to a successful image management project for Hyundai and Ford.

WORK EXPERIENCE

Frontend developer, Andersen Lab, Krakow

May 2020 - PRESENT

PROJECTS

Moonfare - Digital Private Equity Platform

10.2024 - till now

Moonfare – a digital investment platform offering accredited investors access to private equity, portfolio tools, and expert insights. With over €3 billion in assets under management, Moonfare serves a global investor network with a focus on transparency and performance.

Position: Senior Frontend Developer

Key Achievements:

- Migrated the marketing web application to Next.js, **resulting in ~40% faster page load times, improved SEO performance**, and a more flexible, scalable architecture.
- Refactored and restructured legacy codebase, leading to a **noticeable reduction in technical debt** and **measurable improvements in Core Web Vitals**.
- Integrated the application with Strapi (headless CMS), enabling the content team to update and deploy landing pages without developer assistance – **cutting release cycles by ~30%**.
- Built a dynamic page functionality that allows complete customization and creation of new landing pages directly from the Strapi admin panel.

Technologies:

Next.js, TypeScript, React Query, Storybook, Axios, Tailwind, Strapi, Jest, Zod

Automobile Imaging and Management Platform

05.2023 - 09.2024

A multi-disciplinary imaging studio based in Los Angeles and London, developing a web platform for reviewing and delivering automotive digital assets efficiently. **Key clients are Ford and Hyundai.**

Position: Senior Frontend Developer

Key Achievements:

- Designed and built an advanced automotive visualization interface using cutting-edge visualisation and 360° technologies, enabling high-fidelity model previews **for major clients like Ford and Hyundai**.
- **Significantly improved client satisfaction, simplified asset management and made the entire workflow faster, clearer, and centralized** by delivering a seamless experience for reviewing 360-degree images and panoramas, including interactive commenting and annotation tools for design collaboration
- Optimized graphic resource loading, resulting in **faster page rendering and smoother performance** by efficiently handling images and heavy visual assets across the platform.
- **Mentored 2 junior developers** through code reviews, pair programming, and technical guidance — which led to faster onboarding, improved code quality, and a 20% increase in team delivery speed.

Technologies:

React, TypeScript, React Query, React Hook Form, Zustand, Storybook, Axios, MUI, SCSS, CSS Modules

Digital Content Collaboration Platform

07.2022 - 04.2023

A platform for digital creators to collaborate on NFTs, sounds, and gaming assets, generating revenue through smart contracts and revenue share agreements (RSC).

Position: Middle Frontend Developer

Key Achievements:

- Developed user-friendly interface for previewing and interacting with digital goods and NFTs, prioritizing visually appealing content display.
- Optimized the UI for responsiveness across devices, **improving accessibility and usability**.
- Integrated an AI-powered assistant to streamline content creation, enhancing **creator productivity and workflow efficiency**.

Technologies:

Next.js, TypeScript, React Query, React Hook Form, Ant Design, Axios, Styled Components, Jest

HVAC Project Management Platform

03.2021 - 06.2022

A project management platform for the HVAC industry, built to optimize engineering workflows with real-time calculators, collaborative tools, and transparent documentation.

Position: Middle Frontend Developer

Key Achievements:

- Built a real-time engineering calculator for HVAC system parameters directly in the browser, **ensuring high accuracy and performance.**
- Developed a user-friendly interface for document and project management, **improving team collaboration and navigation.**
- Established a scalable frontend architecture that enables **easy integration of new modules** without compromising performance

Technologies:

React, TypeScript, React Query, React Hook Form, MUI, Axios, Styled Components, Jest, Storybook

Banking application

05.2020 - 02.2021

A web platform for managing banking services remotely, enabling users to access loan and deposit information, make payments, transfer funds, and interact with banking products online.

Position: Junior Frontend Developer

Key Achievements:

- Built intuitive and user-friendly web forms for seamless client interaction with banking services.
- Implemented robust client-side data validation and processing using Zod and React Hook Form to enhance security and reliability of financial operations.

Technologies:

React, TypeScript, Redux, Redux Toolkit, React Hook Form, Axios, Styled Components, Jest, Zod, i18next,
